

CUPROFIX 50 WP

FACT SHEET

Product Type: Fungicide

Active ingredient: Mancozeb + copper sulphate

Concentration and Formulation: 50 WP (wetable powder)

Mode of action: Contact and preventive

MAG Registration Number: 4014

Available sizes: 750 grams and 25 Kgs.

Cuprofix 50 WP is a fungicide based on Mancozeb and Copper Sulphate with contact and protective action. It works by blocking the metabolism of the fungus at various stages of the Krebs cycle. The variable action blocks the emergence and multiplication of fungal strains resistant to fungicides, hence the probability of proliferation of resistant strains is very low. Due to the numerous genetic mutations that the fungus would need to become immune to these products.

Authorized Crops:

Tomato, potato, onion, bean, cucurbits, melon, cucumber, watermelon, coffee and mango.

Diseases It Controls:

Early blight, bacterial spot, hairy mildew, purple spot, angular botrytis, anthracnose, angular spot, rust, crow's-eye, raggedy mildew.

Recommended Dose:

From 1.5 to 3 Kg per hectare. In the case of the handle 250 to 500 grams / 100 liters of water.

Period of Application:

8 days.

Compatibility/phytotoxicity:

This product is compatible with most agrochemicals used in agriculture, however, it is recommended to do a preliminary test before using this product. It is not phytotoxic at the recommended dosage.
