

SERACSA WK 86% L

FACT SHEET

COMPOSITION

Nonoxynol

W/W

86%

Available sizes: 1 L, 3.5 L y 19 L.

SERACSA WK 86% SL, is a penetrating moisturizer that improves the action of insecticides, herbicides, fungicides and foliar fertilizers, specially designed so that the fumigations are not washed away by the action of the rains.

Method of application and dose per crop:

Usually add 250 cc (¼ liter) to 200 liters of broth. The dose should be sufficient for the broth to wet and penetrate the foliage well. But not too much so that it does not encourage runoff to the ground. Depending on the broth and foliage (easy or difficult to moisten) the amount of **SERACSA WK 86%**. For 200 litres it ranges from 100 ml to 500 ml or more.

Interval between last application and harvest:

There is no restriction. It depends on the type of pesticide used.

Interval of re-entry to the applied area:

It depends on the type of pesticide used.

Phytotoxicity:

It is not phytotoxic at the recommended dosage.

Compatibility:

There is no problem of compatibility with the pesticides used on the market.
