

GARDNER 25 EC

FACT SHEET

Product Type: Fungicide

Active ingredient: Difenoconazole

Concentration and Formulation: 25 EC (emulsifiable concentrate)

Mode of action: Systemic, curative and preventive

MAG Registration Number: 8702258

Available sizes: 1 L and 20 L.

Gardner 25 EC is a systemic fungicide of the triazole group. It provides a lasting preventive action and a curative action against a wide range of diseases spread through the air, significantly inhibiting the subcuticular development of the mycelium of the fungus and prevents the development of the symptoms of the disease. It has local systemic properties and great ability to transfer.

Authorized crops:

Banana, banana and ferns.

Diseases it controls:

Black sigatoka, yellow sigatoka and colletotrichum.

Recommended dose:

0.2 to 0.4 liters per hectare according to crop.

Period of application

Without restrictions.

Compatibility / phytotoxicity:

This product is compatible with fungicides based on carbendazim, propiconazole, cyproconazole, fludioxonil, metalaxil-m, tebuconazole, mancozeb and ziram. It is not phytotoxic at the recommended dose.
